

River Business Services – 100% renewable energy

Choose clean reporting with zero emission REGOs

River Business
Services

The simple way
to achieve zero
emissions

River Business Services has been designed to help industrial and commercial organisations with their greenhouse gas reporting. With River Business Services, all of the electricity your organisation uses will come with a zero emission rating. We will supply renewable energy backed by a 'guarantee of origin', certifying that your electricity has been generated exclusively through a portfolio of wind and hydro assets.

www.riveruk.co.uk

Meeting the GHG Protocol Corporate Standard

Using the 'market-based' reporting method under the GHG Protocol Corporate Standard, Scope 2, the electricity you purchase can be matched to Renewable Energy Guarantees of Origin (REGOs), allowing you to report zero emissions for 'Scope 2' purchased electricity.

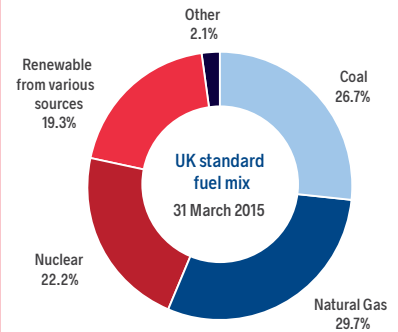

The green approach that's good for business

River Business Services has access to the broadest renewable generation portfolio in the UK and we continue to invest in the infrastructure the country needs to produce more green energy. Since April 2007 over £4bn has been invested in renewable sources of generation with over 2,500MW of wind (onshore and offshore) and Hydro assets.

Our renewable energy capacity provides a real bonus for companies that have to account for their Scope 2 emissions under the GHG Protocol Corporate Standards.

While UK 'standard' electricity from any of the major suppliers reflects a mix of generation sources (including coal, gas and nuclear alongside renewable technologies), River Business Services is 100% renewable energy enabling zero emissions reporting.

How does River Business Services compare?

River Business Services is 100% renewable energy generated by a variable mix of hydro-electric, offshore and onshore wind depending on prevailing weather conditions.

Report zero emissions for 'Scope 2' purchased electricity

Reduce your organisation's carbon footprint

Demonstrate your commitment to renewable and sustainable goals

Enhance your reputation with customers and other stakeholders

Demonstrate best practice in your marketplace

What are REGOs?

REGO stands for Renewable Energy Guarantees of Origin. It certifies that the electricity purchased comes from a renewable source. One REGO is issued for each megawatt hour of renewable electricity generated.

The REGO scheme is administered by Ofgem and has been designed to increase transparency for consumers who wish to buy renewable energy.
